LINDA TRUEB<sup>1</sup>

The first publications of the Museum of Natural History appeared in 1946. Since that time five "series" have been associated with the Museum. The first of these – The University of Kansas Publications, Museum of Natural History (commonly referred to as the "Museum Series") – commenced with Volume 1 in 1946 and terminated with Volume 20 in 1971. The "Museum Series" was replaced by the Occasional Papers of the Museum of Natural History, the first number of which appeared in 1971. The format of the Occasional Papers is designed for publications less than 64 printed pages in length. The Miscellaneous Publications of the Museum of Natural History accommodate longer papers and date from Number 1 published in 1946. The Monograph series was initiated in 1970, the Public Education Series in 1974, and the Special Publication Series in 1976.

The catalogue provided herein is a complete bibliography of titles relating to herpetology published since 1946 by the Museum of Natural History. On cursory perusal, the reader will find that the contributions offered cover a broad biological spectrum; some titles are technical, whereas others are of more general interest – for example, there is an autobiography, and guides to the amphibians and reptiles of Kansas. The catalogue is designed to provide a useful reference and to facilitate the acquisition of herpetological publications by interested persons.

Publications are listed chronologically within each series in the catalogue. Each one is preceded by a serial number composed of 1) the Museum Contribution Number, 2) an abbreviation of the publication series, and 3) the volume (if applicable) and number. Thus, serial number "30-MS-1-3" is Museum Contribution Number 30 of the "Museum Series," Volume 1, Number 3. Abbreviations used throughout are as follows:

MS		Museum Series
MP		Miscellaneous Publications
OC		Occasional Papers
